WORK EXPERIENCE

- Experience in Customer relationship management (CRM).
- Giving training to associates.
- Stock holding application fill and stock holding excel entry.
- Maintaining E-stamp spread sheet and mentioning all the details of the associates.
- Explaining the associates about agreement process and Id releasing process.
- Coordinate with Business functions to close customer PS enquiry and agreed compliance management system.

PERSONAL PROJECTS

1) 5G IMPLEMENTATION USING FBMC TECHNOLOGY

This project explores the implementation of 5G technology utilizing Filter Bank Multicarrier (FBMC) modulation. The primary objective is to investigate the feasibility and performance of FBMC in the context of 5G networks. One crucial aspect addressed in this study is the time taken for 5G signals, modulated using FBMC, to appear on screen once the network becomes available in the market. Our investigation focuses on optimizing the implementation to achieve rapid signal transmission and display

To accomplish this, we develop a code flow chart illustrating the FBMC modulation technique. This flow chart serves as a blueprint for the implementation of FBMC in a 5G communication system. By adhering to this chart, we ensure efficient signal processing and transmission.

The results of our implementation demonstrate that 5G signals modulated using FBMC technology can appear on screen within 0.3 seconds of the network becoming available. This rapid display time showcases the effectiveness of FBMC in enabling swift communication in 5G networks.
